

## SmartPanics App download and test guide

Here we provide instructions to download the **SmartPanics** app on your smartphone and access credentials to the SG Desktop Web to view the alarms sent through the APP.

### Step 1: Download the SmartPanics App

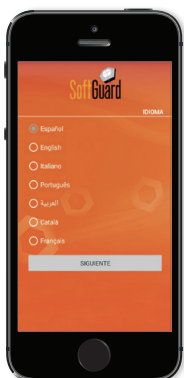

Download the **SmartPanics** App on your smartphone from the Apple or Android store. Search for it as SmartPanics NG

ANDROID: <https://play.google.com/store/apps/details?id=com.softguard.android.smartpanicsNG>

iOS: <https://itunes.apple.com/es/app/smartpanicsng/id1058553591?mt=8>

### Step 2: Settings

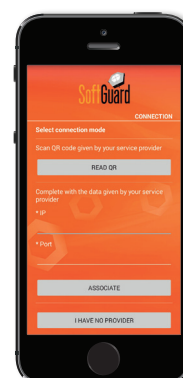

> Choose a language from the list

> Complete the fields with the following data.  
**IP:** eng.softguard.com  
**Port:** 8080

> You can also read the following QR code:

> Enter your name, telephone number and try to connect

### Step 3: Display and manage the alarm events

To attend and process the alarm events go to:

<http://eng.softguard.com:8080>

To enter the platform, please use the access data in the attached e-mail.
